AMENDMENTS TO THE CLAIMS

This listing of claims will replace all prior versions, and listings, of claims in the application:

Claim 1. Canceled.

Claim 2. (Currently amended) A pop-up dispensing system for reliable single dispensing of discreet pre-moistened wipes in consecutive order, the system comprising:

- (a) a container having an interior portion and an aperture for drawing through the pre-moistened wet wipes in consecutive order;
- (b) a plurality of the pre-moistened wipes, the wipes being stacked, folded and interleaved in a substantially interfolded z-fold pattern in the interior portion of the container;

wherein the pre-moistened wipes are wetted with a lotion, the lotion being an aqueous solution comprising at least about 90% by weight water, a surfactant selected from the group consisting of phosphate-quaternary amine compounds and non-ionic surfactants, and effective amounts of a second ingredient selected from the group consisting of non-cellulosic organic water soluble polymers and alkoxylated alcohols and wherein each of the pre-moistened wipes has a leading edge panel having a length of from about 2 cm to about 7 cm, a central panel having a length of from about 3 cm to about 12 cm, and a trailing edge panel having a length of from about 2 cm to about 7 cm and The pop-up dispensing system of Claim 17 wherein the phosphate-quaternary amine compound is selected from the group consisting of Coco Phosphatidyl PG-Dimonium Chloride, Cocamidopropyl Phosphatidyl PG-Dimonium Chloride, and Stearamidopropyl Phosphatidyl PG-Dimonium Chloride.

Claim 3. (Previously presented) The pop-up dispensing system of Claim 2 wherein the lotion comprises less than about 3 percent by weight of the phosphate-quaternary amine compound.

Claims 4 - 10. Canceled.

Claim 11. (Currently amended) A pop-up dispensing system for reliable single dispensing of discreet pre-moistened wipes in consecutive order, the system comprising:

Appl. No. 09/918,223  
Atty. Docket No. 7496RC

- (a) a container having an interior portion and an aperture for drawing through the pre-moistened wet wipes in consecutive order;
- (b) a plurality of the pre-moistened wipes, the wipes being stacked, folded and interleaved in a substantially interfolded z-fold pattern in the interior portion of the container;

wherein the pre-moistened wipes are wetted with a lotion, the lotion being an aqueous solution comprising at least about 90% by weight water, a surfactant selected from the group consisting of phosphate-quaternary amine compounds and non-ionic surfactants, and effective amounts of a second ingredient selected from the group consisting of non-cellulosic organic water soluble polymers and alkoxylated alcohols and wherein each of the pre-moistened wipes has a leading edge panel having a length of from about 2 cm to about 7 cm, a central panel having a length of from about 3 cm to about 12 cm, and a trailing edge panel having a length of from about 2 cm to about 7 cm and The pop-up dispensing system of Claim 17 further comprising an effective amount of a fragrance and an effective amount of a fragrance solubilizer.

Claim 12. (Currently amended) A pop-up dispensing system for reliable single dispensing of discreet pre-moistened wipes in consecutive order, the system comprising:

- (a) a container having an interior portion and an aperture for drawing through the pre-moistened wet wipes in consecutive order;
- (b) a plurality of the pre-moistened wipes, the wipes being stacked, folded and interleaved in a substantially interfolded z-fold pattern in the interior portion of the container;

wherein the pre-moistened wipes are wetted with a lotion, the lotion being an aqueous solution comprising at least about 90% by weight water, a surfactant selected from the group consisting of phosphate-quaternary amine compounds and non-ionic surfactants, and effective amounts of a second ingredient selected from the group consisting of non-cellulosic organic water soluble polymers and alkoxylated alcohols and wherein each of the pre-moistened wipes has a leading edge panel having a length of from about 2 cm to about 7 cm, a central panel having a length of from about 3 cm to about 12 cm, and a trailing edge panel having a length of from about 2 cm to about 7 cm and The pop-up dispensing system of Claim 17 further comprising a keratolytic.

Claim 13. (Currently amended) The pop-up dispensing system of Claim 17 12 wherein the keratolytic comprises allantoin.

Claim 14. Canceled.

Claim 15. (Currently amended) A pop-up dispensing system for reliable single dispensing of discreet pre-moistened wipes in consecutive order, the system comprising:

- (a) a container having an interior portion and an aperture for drawing through the pre-moistened wet wipes in consecutive order;
- (b) a plurality of the pre-moistened wipes, the wipes being stacked, folded and interleaved in a substantially interfolded z-fold pattern in the interior portion of the container;

wherein the pre-moistened wipes are wetted with a lotion, the lotion being an aqueous solution comprising at least about 90% by weight water, a surfactant selected from the group consisting of phosphate-quaternary amine compounds and non-ionic surfactants, and effective amounts of a second ingredient selected from the group consisting of non-cellulosic organic water soluble polymers and alkoxylated alcohols and wherein each of the pre-moistened wipes has a leading edge panel having a length of from about 2 cm to about 7 cm, a central panel having a length of from about 3 cm to about 12 cm, and a trailing edge panel having a length of from about 2 cm to about 7 cm. The pop-up dispensing system of Claim 18 wherein the pre-moistened wipes comprise a nonwoven substrate and wherein the substrate is wetted with at least 1.0 gram of the lotion per gram of dry substrate weight.

Claim 16. (Currently amended) The pop-up dispensing system of Claim 18 15 wherein the substrate is wetted with at least 2.0 gram of the lotion per gram of dry substrate weight.

Claim 17 - 20. (Canceled)
